

PERMIT MODULE II CONDITIONS OF OPERATION

II.A. HOURS OF OPERATION

II.A.1. The normal operating hours for waste delivery acceptance by residential and non-commercial users shall be:

- Monday through Friday: 8:00 a.m. to 4:00 p.m. Saturday 8:00 a.m. to 12:00 p.m.
- Sundays and Holidays: Landfill is closed on Sunday, and Labor Day, Thanksgiving, Christmas Day, and New Year's Day.

The hours of operation occasionally may be revised to accommodate temporary increases to waste disposal rates such as may be needed to handle debris and wastes resulting from natural or man-made disasters, large construction/revitalization projects, or large sporting/social events.

Operational hours vary for the citizen convenience center, the scrap metal recycling stockpile, yard waste drop-off and mulching area, and the landfill office. Operational hours may be altered by the facility upon notification to the Department.

II.A.2. Emergency conditions or unusual circumstances that require accepting waste outside of the normal operating hours shall be reported orally to the DEQ Piedmont Regional Office at (804) 527-5020 within 24 hours followed by a formal written submission within 5 days.

II.B. WASTES ACCEPTED

The Prince Edward County Sanitary Landfill may receive the following wastes, as defined by 9VAC20-81-10, or described below:

I I.B.1 Agricultural waste.

II.B.2 Animal carcasses. Small carcasses (e.g. dogs and cats) may be handled with incoming waste. Large animals and small volumes of animal carcasses (<20 cubic yards) may be received by the facility, but must be placed in a separate area within the disposal unit and provided with a cover of compacted soil or other suitable material. Disposal of large volumes of animal carcasses must be approved by the Department prior to disposal.

II.B.3. Ashes and air pollution control residues that are not classified as hazardous waste. Incinerator and air pollution and control residues should be incorporated into the working face and covered at such intervals as necessary to keep them from

becoming airborne.

- II.B.4. Commercial Waste.
- II.B.5. Construction, demolition, and debris waste.
- II.B.6. Fossil Fuel Combustion Products/Coal Combustion Residuals
- II.B.7. Industrial Waste
- II.B.8. Institutional Waste
- II.B.9. Municipal solid wastes, including garbage, household waste, refuse residential waste, rubbish and trash.
- II.B.10. Non-regulated hazardous wastes and treated wastes rendered nonhazardous, upon approval from the Department.
- II.B.11. Scrap metal.
- II.B.12. Sludge. Municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, and air pollution control facility sludges that have been dewatered.

Sludges shall be disposed of by mixing with other solid wastes, placed, and compacted at the working face in a manner to prevent localized pockets of sludge or conditions which might result in future instability of the waste mass.
- II.B.13. White goods, provided that all appliances are free of chlorofluorocarbons and PCBs prior to placement on the working face. White goods may be accumulated at the facility in accordance with 9VAC20-81-650.
- II.B.14. Vegetative and yard waste, including stumps that are less than 12 inches in diameter.
- II.B.15. Waste Tires. Tires shall be stored at the waste tire storage area in an appropriate manner in accordance with 9 VAC 20-81-640. Tires may also be split, cut, or shredded and then beneficially used or dispersed in the workface with other solid wastes for disposal.
- II.B.16. White goods provided that all appliances are free of chlorofluorocarbons, hydrochlorofluorocarbons, and PCBs prior to placement on the working face. White goods may be accumulated at the facility in accordance with 9VAC20-81-650.
- II.B.17. UNAUTHORIZED WASTE – The Prince Edward County Sanitary Landfill may

not receive any unauthorized wastes identified in 9 VAC 20-81-140.B.4. or any of the following: waste oil that has not been adequately absorbed through site cleanup; radioactive wastes; lead acid batteries; pressurized tanks or pressurized containers; automobile gas tanks; friable and some non-friable asbestos-containing waste materials as defined by 9VAC20-81-620; regulated medical waste; explosives or other dangerous materials; and junked automobiles.

II.C. PERMIT LIMITS

The facility has a daily disposal limit of 300 tons per day as specified in the Design Report.

II.D. COMPACTION & COVER

II.D.1. Daily cover consisting of six inches of compacted soil or other approved material shall be placed upon and maintained on all exposed solid waste prior to the end of each operating day, or at more frequent intervals, if necessary, to control disease vectors, fires, odors, blowing litter, and scavenging. Approved alternate daily cover materials include:

II.D.1.a. Synthetic tarp as defined in Module III

II.D.1.b. Other alternate materials that have been approved by the Director for use at this facility.

II.D.1.c. The use of an ADC material shall cease if the material is not effective at achieving the purposes of daily cover set forth in 9 VAC 20-81-140.B.1.c., if the use results in nuisances, or if the material is erodible and results in waste being exposed.

II.D.2. Intermediate cover shall be applied when another lift of waste will not be placed for more than 30 days or to areas which exhibit erosion, cracking, or settlement.

II.D.3. Before placement of new waste in areas with low permeability daily cover soil or alternate daily covers, or in areas with intermediate cover, cover materials shall be removed or penetrated such that leachate can flow downward unimpeded to the leachate collection system.

II.D.4. Final cover construction as outlined in Permit Module XII shall be initiated in accordance with 9 VAC 20-81-160.D.2.

II.E. HOUSEKEEPING

II.E.1. The facility shall control odors in accordance with 9VAC20-81-200.D and/or as necessary to protect human health and the environment.

II.E.2 The facility shall use fencing or other suitable control means to control litter migration. All litter blown from the operations shall be collected on a weekly basis.

II.E.3 Fugitive dust and mud deposits on main offsite roads and access roads shall be limited at all times to limit nuisances. Dust shall be controlled to meet the requirements of 9VAC20-81-140.A.12.

II.E.4. Salvaging may only be performed in areas of the facility designated for salvaging or recycling. Salvaging operations must not interfere with the operations of the landfill or create hazards or nuisances.

II.E.5. Open burning at active landfills shall comply with the requirements of 9VAC20-81-140.A.4. Open burning is prohibited at areas where waste has been disposed or is being used for active disposal.

II.F. SAFETY PROGRAM

Safety hazards to operating personnel shall be controlled through an active safety program consistent with the requirements of 29 CFR Part 1910. Safety training shall be performed annually, at a minimum.

II.G. SELF-INSPECTION PROGRAM

The landfill shall implement an inspection routine including a schedule for inspecting all applicable major aspects of facility operations necessary to ensure compliance with the requirements of this chapter. Records of these inspections must be maintained in the operating record and available for review. At a minimum, the following aspects of the facility shall be inspected on a monthly basis: erosion and sediment controls, storm water conveyance system, leachate collection system, safety and emergency equipment, internal roads, and operating equipment.

II.H. LEACHATE MANAGEMENT

All leachate collected in the leachate collection system shall be stored in the leachate storage pond, where it will be pumped and hauled to a permitted wastewater treatment plant.

The facility shall follow the regulations required by 9 VAC20-81-210.F. and Module III when leachate seeps occur.

II.I. LANDFILL GAS MANAGEMENT

Landfill gas shall be monitored in accordance with 9VAC20-81-200 and the facility's Landfill Gas Management Plan. The gas management system shall be inspected at a rate consistent with the system's monitoring frequency.

II.J. GROUNDWATER MONITORING

Groundwater shall be monitored in accordance with 9VAC20-81-250, Module X, XI, and XIV, and their respective permit documents as applicable. The groundwater monitoring system shall be inspected at a rate consistent with the system's monitoring frequency.
